DOCKET FILE COPY ORIGINAL

Dear Commissioner Martin,

I was gratified to learn that the FCC is "actively considering" the issue of blocked access to video relay services (VRS). Please require interoperability and compatibility across Relay providers at the earliest possible date. I agree with the National Association of the Deaf that this rule should be required. See <http://www.nad.org/openrelay> for more information.

I want to be able to use Relay anytime with anyone, using any Relay provider, just as two hearing people can call each other regardless of who is their telephone product/service provider.

Video and IM Relay have become valuable tools for me. The traditional telephone (including TTY) is not practical for me. The use of Relay has made my work much more effective and I have become more productive. However, the value of Relay is limited because not everyone has access to my Relay product/service. Please end the exclusion of deaf and hard of hearing people from full access to telecommunications by requiring open interoperability and compatibility across Relay providers.

I do accept free Relay equipment and software from providers—not necessarily because I like a particular provider the most—but because it is free—and allows me to make calls I couldn't make before. While I appreciate the free equipment and software, I want to be able to make and receive Relay calls from anybody without any restrictions from Relay providers.

I look forward to the FCC acting quickly to implement rules ending blocking and requiring interoperability.

Sincerely,

Randy Gaffney

MAY - 5 2006

Federal Communications Commission
Office of the Secretary

Dear Commissioner Martin,

Thank you for your decisive leadership on July 14, 2005 accepting the National Association of the Deaf petition on captioning, adopting Video Relay Service (VRS) rules that will improve the quality of VRS and ensure that it moves closer to the goal of functional equivalent access to telecommunications, and clarifying that two-line captioned telephone service can be reimbursed by the TRS fund.

I am thrilled with the new VRS rules that the FCC passed to ensure that the service is brought closer to the goal of a functional equivalent telecommunications service. These rules will make our lives easier now that I can access the nation's telephone network using VRS, 24 hours a day, 7 days a week, and with a prompt response to my initial call. In addition, I look forward to using the VRS Mail feature to leave messages with my friends, family, and co-workers. I also look forward to new rules upgrading and enforcing the quality of captions on television.

However, I urge the FCC to continue to improve the speed of answer for VRS and to enforce FCC rules against blocking. I should be able to use any provider I want without interference from any other provider.

Thank you!

Sincerely,

Elizabeth O'Dell
